Inspiring Students Through Innovative Education

December 19, 2013

To Whom It May Concern:

The Lotus Pro Cleaning System was introduced to the Forney Independent School District in April of 2013. After a successful test was conducted at Criswell Elementary School, we decided to roll out the Lotus Pro Cleaning System to the schools in our District in their restrooms, classrooms, cafeteria, gym and floors.

Upon using this cleaning system, we established that we could clean all surfaces (glass, wood, tile, toilets, sinks, carpet, stainless steel and mirrors) with just this one product and eliminate the 6-7 products we routinely used to clean. Not only did this product reduce the number of products used, it also cleaned and sanitized the surfaces better while being more environmentally friendly and reducing the harmful effects of the other chemical cleaning products to our students and staff.

While using this product, Forney ISD has seen 60% lower costs from that of our current cleaning products. Our custodians are very pleased with the Lotus Pro Cleaning System and feel that their campuses are cleaner, brighter and chemical-free. They also feel that amount of time spent cleaning has been reduced, thereby giving them additional time to spend on other duties. If additional information is needed, please feel free to contact me.

Sincerely,

Michael Holland
Superintendent of Schools
